PARASOUND

## 4 DAX Four Zone 192kHz/24bit DAC and Crossover

Four ESS Sabre DACs in a single chassis. Hi/Low, mono & subwoofer outputs

The ZoneMaster® 4 DAX is the first four-zone, four-source single chassis DAC with integrated crossovers, mono outputs and subwoofer connectivity. The innovative design allows custom installers to upgrade their digital sound quality and add speaker flexibility when creating multi-zone systems based around the Sonos Connect®, BlueSound Node®, Google Chromecast Audio®, or Apple Airport Express®. Since all of these streaming devices have their own digital volume control the 4 DAX eliminates the need for additional preamps or house audio controllers. High and low pass crossover options and multiple mono outputs add flexibility previously not possible in a single 1U rack space.

The 4 DAX achieves superior audio performance by using four premium 192kHz/24bit ESS Sabre DACs and four Parasound-designed analog crossovers. Each of the four zones' analog outputs include full-range stereo, high-pass stereo, full-range mono, high-pass mono and low-pass mono/subwoofer. Each zone includes optical and coax inputs, level adjustments for left and right channels as well as its own 12V output for triggering additional equipment such as amplifiers and cooling equipment. Parasound's ZoneMaster line of multi-zone amplifiers has independent trigger inputs for each zone making them a perfect companion to the ZoneMaster 4 DAX.

Previously, installers would have needed four separate DACs and four crossovers in four separate chassis, taking up precious rack space and making integration with subwoofers and bass limited speakers overly complicated. Combine all this connectivity with legendary Parasound sound quality and it makes the 4 DAX the ideal upgrade to any whole-house audio installation.

Sonos Connect®, BlueSound Node®, Chromecast® Audio® and Airport Express® are registered trademarks of their respective owners.

Features:

- Four Independent DACs in a single chassis
- High and low pass stereo and mono/subwoofer outputs for each zone
- 12V trigger output for each zone
- Level controls for all channels
- 192kHz/24bit ESS Sabre DACs with Hyperstream™ jitter eliminator
- 3 Volt high gain outputs
- Optical and coaxial digital inputs
- Indicators for digital input signal lock and analog audio output

Sonos Connect®, Heos Link®, BlueSound Node®, Google Chromecast Audio®, Apple Airport Express® and ESS Hyperstream™ are registered trademarks of their respective owners.
